

MOBILISE LABOUR FASTER.

WorkTool is a construction workforce platform that helps agencies and employers find, review and contact suitable workers for live roles.

It gives hiring teams visibility of who is available, where they are based, what trade they do, how they travel, and which cards, tickets and qualifications they hold.

THE CHALLENGE MOST TEAMS FACE

- ✓ Construction labour needs change quickly. Jobs come in, sites move, cover falls through and candidate lists go stale.
- ✓ Too much time is lost chasing workers who may no longer be available, suitable or ready to start.
- ✓ WorkTool gives your team live visibility of available construction workers, helping you reduce wasted admin, fill roles faster and avoid last minute gaps.

BUILT FOR HOW CONSTRUCTION HIRING WORKS

- ✓ WorkTool is designed for agencies, employers and hiring teams managing fast moving construction roles.
- ✓ It brings availability, location, trade, transport, cards and qualifications into one place, so your team can focus on the workers most likely to be suitable before making contact.

Want a live view of workers who are available and ready to start?

WHY BUSINESSES ARE ADOPTING WORKTOOL

LIVE AVAILABILITY

See workers who are actively available for work, rather than relying on old spreadsheets, historic databases or cold contact lists.

BETTER MATCHING

Search by trade, location, transport, CSCS, cards, tickets and qualifications.

LESS CHASING

Send relevant job alerts through the app and reduce repeated outbound calls, costly texts and follow ups.

MORE CONFIDENT STARTS

Review key work details and compliance evidence before putting someone forward or booking them in.

LOWER SOURCING COSTS

Reduce repeat advertising, broad outreach and wasted time contacting unsuitable or unavailable people.

FEWER LAST-MINUTE GAPS

Find suitable workers earlier and fill urgent roles before gaps affect site progress or delivery.

READY TO SEE IT IN ACTION?

Book a 20-minute demo and see how quickly you could start filling roles faster. Rhys Westcarr:
